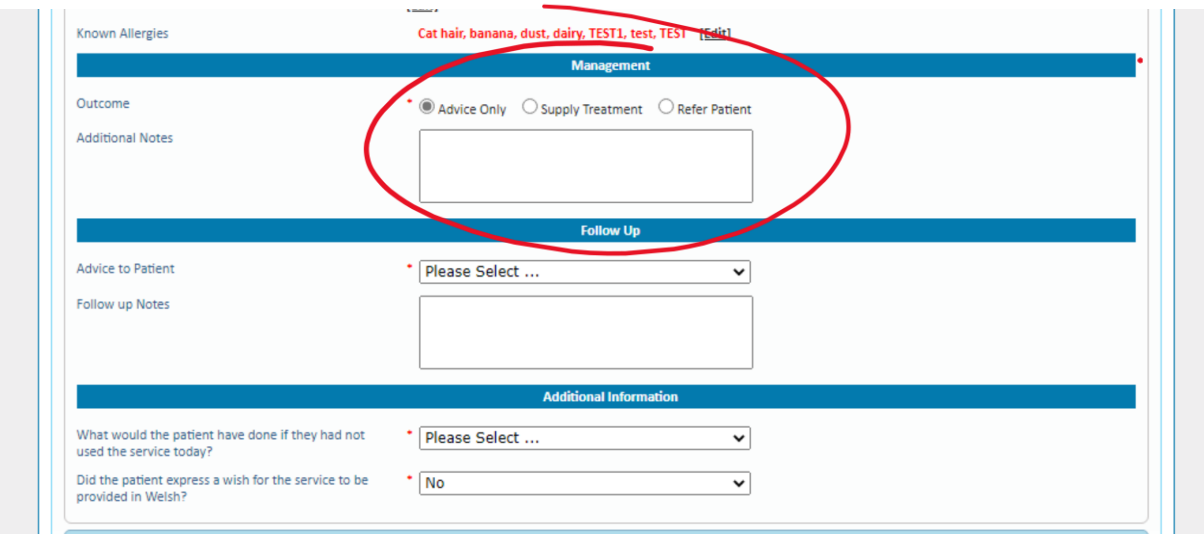
Guidance for Annotation of Choose Pharmacy Records for patients offered access to PREMS survey as part of Winter Incentive Scheme

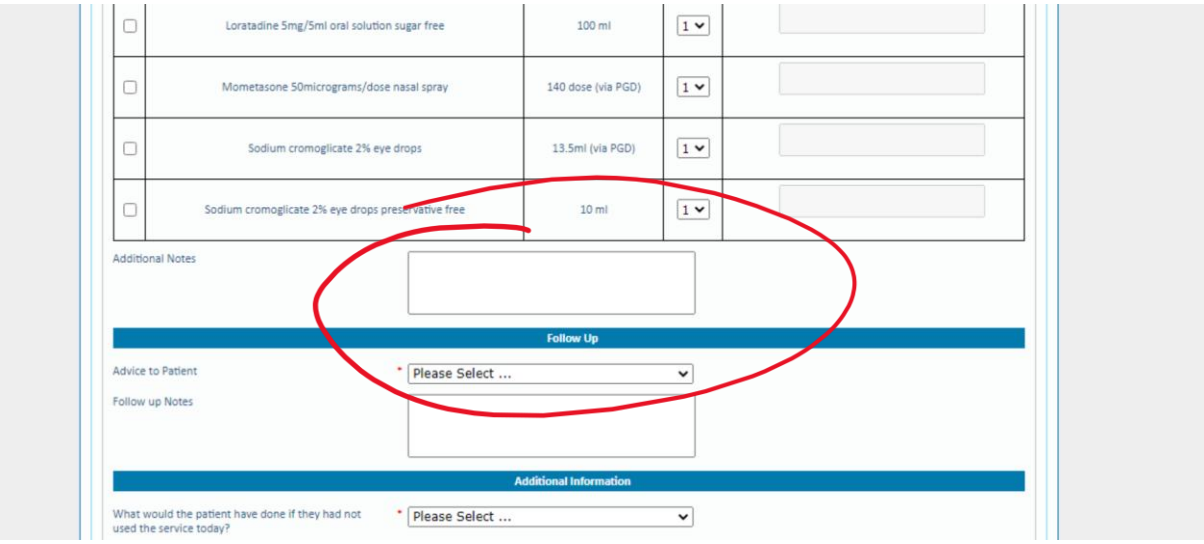
As part of the Winter Incentive Scheme Contractors should provide all CAS patients with information about the PREMS feasibility study during consultations and annotate the consultation record in Choose Pharmacy with code 'PREMS'.

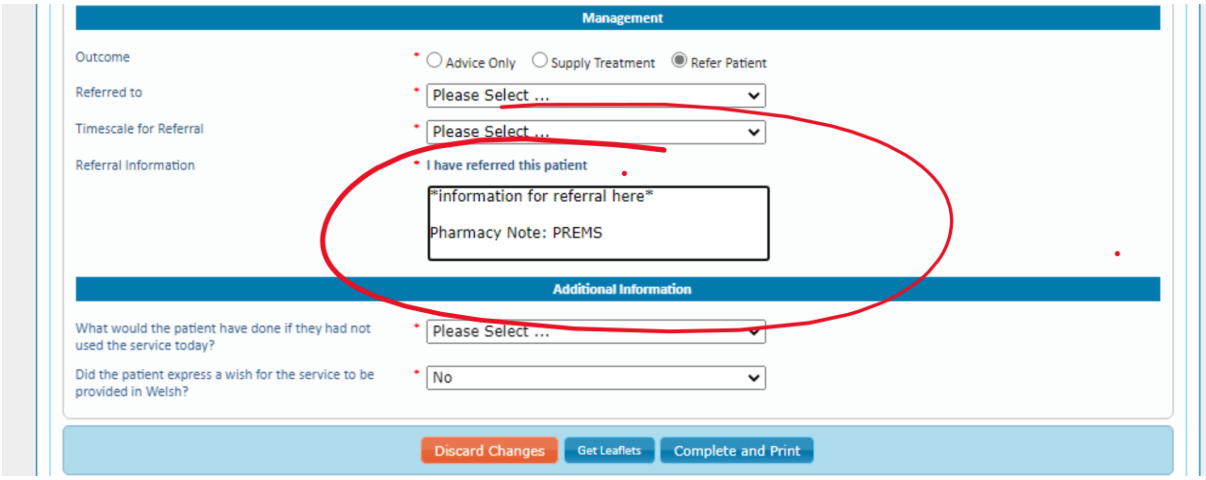
The below guidance captures where this information should be entered based on the chosen Management option for each patient

1. **Where Advice Only is selected – capture in additional notes**



2. **Where medication is supplied – capture in additional notes**





3. **<u>Where patient is referred – No Additional information box appears on the consultation form. After capturing the reason for referral in the appropriate box it is suggested that the pharmacist should annotate with Pharmacy Note: PREMS , so as to make it clear that this is for pharmacy reference only and not for the clinician the patient is being referred to</u>**
